

Aviation on the Ground

Solid Ground for Airplanes

Thanks to the integration of the former Push members, the aviation sector has gained importance within SEV.

Aviation is a complex industry: Many international corporations are fighting over shares of the market. A powerful union is needed to prevent this battle from being fought at the expense of employees, which can be done with the help of collective labour agreements. SEV has become a strong partner for ground staff (technics, administration, ground staff, employees at airports and service companies). In this edition of *kontakt.sev*, we would like to expose current issues in the aviation industry to workers from other sectors within the union.

Good to know: SEV-GATA's motto is "Ready for take-off!"
